

Hi name,

Welcome to the Q1 2024 edition of our digital newsletter

PLC Group Partners with EdgePoint Infrastructure for Enhanced Operational Excellence in the Philippines:

Great news! We've partnered with EdgePoint Infrastructure to deploy RMS and AxIn Software across 2,500 sites in the Philippines. With support from the Canadian Embassy, we're establishing a major Technical Hub, showcasing our commitment to regional markets and Canadian innovation. Notably, we now boast a 60-plus workforce in the Philippines, further enhancing our capabilities in the region.

Enhancing Efficiency Across 200 Canadian Carrier Facilities:

We've secured a significant agreement with a leading Canadian carrier provider for the replacement of energy-efficient equipment. PLC has been selected by this major

carrier to handle cooling and remote monitoring across 200 facilities throughout Canada. Our scope encompasses hardware supply, installation, and project management, leveraging our AxIn actionable intelligence platform to optimize operations and efficiency.

TowerXchange Meetup MENA in Dubai 2024:

We attended the TowerXchange Meetup MENA in Dubai 2024, a prestigious industry event held from February 07 to 08. It was an exciting event filled with great interactions with our existing and potential customers, industry leaders, and partners.

Introducing Mobile Generator Monitoring and Maple Edge 2:

Expanding our product offerings, PLC now offers a comprehensive solution for mobile generator monitoring and control, including advanced fuel management capabilities. Building upon our longstanding portfolio in generator monitoring and control, this new solution integrates state-of-the-art hardware with our actionable platform.

The introduction of our new Maple Edge 2 Gateway marks a significant advancement, boasting cost efficiency, enhanced security, and improved reliability. with optional mobile capabilities alongside its IP connectivity.

Introducing e-NOC in AxIn Platform: Empowering Total Operational Control:

We've integrated e-NOC into the AxIn Platform, revolutionizing telecom infrastructure management. Operators now have unparalleled control, monitoring, and optimization capabilities, facilitating data-driven decisions and ensuring reliability. Leveraging advanced technology and analytics, ENOC enables proactive maintenance, real-time monitoring, and predictive insights. Specifically targeting Mean Time to Repair (MTTR) for site-level alarms, ENOC provides meaningful data analytics, enhancing operational efficiency and meeting SLA commitments by

minimizing site downtime.

Global Technical Assistance Center (TAC) under the FLEX Program:

As part of the FLEX program, we're excited to unveil our new Global Technical Assistance Center (TAC), strategically located with engineers spanning regions including North America, Southeast Asia, and the Asia-Pacific. This initiative ensures that our customers have direct access to expert support for all their inquiries. Reach out to us anytime via our toll-free number, +1 855-752-4787, or email us at support@plcgroup.com for prompt assistance.

Furthermore, we've established an independent QA and reliability department dedicated to enhancing our hardware and software processes. This initiative reflects our commitment to continuous improvement across all facets of our organization, from design and manufacturing to implementation and after-sales support, ensuring the highest standards of quality and reliability for our customers.
